Notes legend:

A =Freestanding programming box for the original Bravo/Lifestyle pagers, requires no computer

B =Universal P C Interface (& IBM style PC) required for most below software, software runs under DOS unless marked WIN or IR

C =uses special RIB (included) or no RIB, does not use the NLN3548 Universal PC Interface

IR =requires InfraRed (IR) programming adapter, does not use the NLN3548 Universal PC interface

WIN =Windows operating sytem (not XP or DOS) required. Note Pentium 3 & higher or the XP OS DO NOT WORK.

Note that some pager models require different software to program Pocsag or Flex models but the programming cradles are the same.

Note also that some different models use a common cradle. We have used color in the Cradle Only column to highlight shared cradles.
